Champion United Church

Minister—Rev. PETER DAWSON.
Pianist—Miss M. McCULLOUGH.
Sunday, Sept. 2nd
11:00 A.M. Church School as Champion.
Blessing Service at 2:30 P.M.
7:30 P.M. — Evening Worship

Local & General

F. Sison was a business visitor in Calgary last week.

Miss Dorothy Hummel is a Calgary visitor this week.

J. T. Stephenson is assisting D. Chamberlain in painting the Yale School.

A jack rabbit was picked up by J. Lebasque's combine and caused \$15 damage.

J. D. Hagerman reports that one of his milk cows gave birth to triplets last week.

M. P. Diemert of Vancouver arrived in town on Thursday, thus explaining the sudden change in the weather.

Rev. Peter Dawson will preach at Vulcan Sunday morning Sept. 2nd.

Mrs. Theriault and Mrs. Côté of Calgary, were week end visitors in town.

Divine Worship will be held at Blusson at 2:30 p.m. instead of 11:30 a.m., Sunday Sept. 2nd as announced.

Rev. Peter Dawson has returned from his holidays and will be in charge of the service Sunday. A good attendance is requested Sunday evening at Champion.

Rita and Linda Cemulini will leave the first of the week for Pincher Creek, where they will attend the convent there for the coming year.

I. Fisher is suffering from injuries received to his hand when a gas engine he was working with, exploded.

Miss Margaret Cameron, who spent the holidays in Eastern Canada, returned to Champion last week and has been a guest at the home of Mr. and Mrs. J. D. Henderson.

Mr. and Mrs. T. G. Honeywill of Sube, are receiving the congratulations of their friends on the birth of a son, Hugh Douglas, on August 22nd. Mrs. Honeywill was formerly Miss Forbes McGillivray.

Mr. and Mrs. Rimby were in town Thursday and made arrangements to rent the Krammer house, formerly occupied by R. D. Farries. Mr. Price will be on the staff of the local Canadian Bank of Commerce, succeeding C. Desson.

Doris Boner suffered a broken ankle when the horse she was riding became frightened and threw her off. The accident was very unfortunate due to the fact that this arm was previously broken at the shoulder.

Be sure and take advantage of the special price of U. Hummel's in setting Wagon tires, from the 1st of Sept. to the 15th.

The Misses Louretta Cleva and Ruth Jopling, who have spent the past week as guests Mrs. V. S. Jopling in Calgary returned to their home Monday.

The Misses Pauline and May Fisher, who have been holidaying in Calgary, guests at the home of Mr. and Mrs. Edwin Fisher, returned to their home Monday.

The Chronicle will be pleased to receive items for the local columns regarding visitors, entertainments, parties leaving for holidays or short trips, teas, bridge parties, etc. Phone items to 1206.

Miss Jean Anderson will return to Calgary the latter part of this week from Europe, where she has spent the past few months touring England, France and Italy.

Local & General

Max Caldwell is the assistant at the Searle Elevator.

R. McCullough was a week end visitor in Calgary.

Seen special flyer for grocery prices—McCullough Bros.

G. K. McLean was a Calgary visitor recently.

R. C. Crane was a Calgary visitor over the week end.

Mr. and Mrs. J. S. Collins and family returned from their holiday this week.

Excellent values in Ladies' Silk and Print Dresses at Camphe's.

Pickling Cakes, Cauliflower, Onions, Celery, Spices. Everything you need at Campbell's.

Mrs. Ted Ashmore is a guest at the home of her sister, Mrs. J. Walker, in Blackie.

Alberta Grain Growers

READ THIS MESSAGE!

It is of vital importance that a "strong co-operative elevator system should flourish in Alberta. It is desirable that such an elevator system should be under the control of Alberta grain growers—men who are actually following the occupation of farming.

The Alberta Pool Elevator system is the only organization in Alberta that meets these requirements.

All country elevators of the Pool system are operated under public license and as such are in a position to handle the grain of any grower.

Alberta Pool Elevators are on a sound financial basis; are efficiently managed and can give unexcelled service to the grain grower in this province. Alberta Pool agents are carefully selected and have strict instructions to give fair treatment, including proper weights and correct grades, to all patrons.

Alberta Pool Elevators operate on the co-operative principle of "Each for All and All for Each"—a principle which will tend to bring a measure of economic and social justice, peace and prosperity throughout the world.

Alberta Pool Elevators

MARGARET E. PATTERSON

Local & General

Mr. and Mrs. Chellis of Vancouver are the guests of Mr. and Mrs. H. Tyler. They are old school friends of Mr. Tyler.

Have the children's eyes examined before returning to school. Consult K. R. McLean, Sight Specialist of Calgary, at the Champion Drug Store, Friday, August 31st.

Messrs. Fairbairn & Clarke, Barristers, Lethbridge, wish to announce that Mr. L. E. Fairbairn will be in attendance at the office occupied by G. H. Marks, on Friday afternoon of each week, hours four to seven.

Miss Helen Farmer was a tea hostess on Tuesday when her guests included the Misses Dorothy Jorgens, Phyllis Bastin, Katherine Bach, Edna Oshel, Aileen McCullough, Rheta Campbell and Elsie McLean.

Snodgrass Funeral Home

Funeral Home and Stock in Vulcan
Licensed Embalmer
Phone 222 High River

Mr. and Mrs. Lee Smith and family, of Fort St. John, B.C., are visitors in the district with relatives. After a short stay here they will motor to the coast for a holiday at Victoria and Vancouver. For a number of years Mr. Smith operated the Smith Coal Mine, before moving to Fort St. John, where he is now farming.

The community will be sorry to hear of the loss of one of its citizens. C. H. Nelson, section foreman of the C.P.R. has been transferred to Kipp. Mr. Nelson, known as "Charlie" was well liked and respected in the community, and the loss will be keenly felt.

You have all read the story by E. Phillips Oppenheim, entitled "The Top on the Wall." Now we have an actual experience told by I. Granlin, called "The Top on the Barrel." While coming out of Turner Valley the other night a man boarded the truck, unknown to Mr. Granlin. He began tapping on the barrels and began to look like one of those perfect crimes to begeth until he stopped to investigate. He then proceeded to give the transient the "bum's rush."

ORANGE PEKOE BLEND

"Fresh from the Gardens"

Now It Could Be Done

Probably it is an direct reaction to the appalling state of Ireland now, rest which keeps international nerves continually on edge that more is being written and heard now of peace and its perpetuation than was heard or written during the great fiasco which terminated in the framing of the Treaty of Versailles.

The Anglo-Saxon world, at least, has come to the conclusion that a treaty inspired by revenge and nurtured by fear is altogether too provocative an instrument to produce anything more than a mere armistice or truce. That section of the world now is convinced that the Christian virtues of humility and fraternity could and would provide a better background for an abiding peace featuring the essential conditions of harmony and mutual co-operation.

It is hard to concede that mankind is devoid of capacity to bring about this condition or state. In fact, when one scans the war efforts of the belligerent nations between 1914 and 1918, one is forced to conclude that only the will is lacking. Were the efforts made then to destroy life and property exerted now to preserve life and property, world peace quickly would be achieved. There is no doubt of it.

If doubts be cherished, they would quickly be dispelled by reference to the recently published "War Memoirs of Lord Lloyd George. First of Britain's Minister of Munitions then as her premier, Mr. Lloyd George was primarily responsible for organizing the country's human and industrial resources for victory. How far-reaching, how extensive that organization was, is vividly revealed in the pages of his narrative. All essential industries were brought within the compass of his authority. All were made to contribute their full quota to the national effort. That gigantic organization was established for the dual purpose of building up the allied, and of breaking down the enemy, capacity to endure. The achievement shows conclusively what can be done by organization on the grand scale.

Considering the efficacy of war-time organization and effort, surely it is not foolhardy to suggest that, were the methods of the war applied to the units in organizing in the cause of peace, lasting and prosperous peace would ensue. And were the same efforts applied to solving the economic problems of the peoples of the world unquestionably they, too, would yield.

It is a strange country, this world, where the methods of the war, that sacrifices to win a war should be described as "heroic" and, as such, borne with determination and a grin, while sacrifices to win a peace should be branded as humiliating and intolerable. It is strange, too, that war could be financed with no insuperable difficulty, while peace requires an economic depression to keep innocent people from starvation, present apparently insurmountable obstacles to the governments concerned.

Nicholas Murray Butler, noted American liberal, recently translated the financial cost of the world war into graphic and startling terms. It cost 400 billion dollars. "With that money," he says, "we could have built a \$2,500 house, furnished it with \$1,000 worth of furniture, placed it in five acres of land worth \$100 an acre, and given the home to each and every family in the United States, Canada, Australia, England, Scotland, Wales, Ireland, France, Belgium, Germany and Russia. We could have given to each city of 20,000 inhabitants, and over in each country named, a five million dollar library and a ten million dollar university. Out of what was left we could have set aside a sum at five per cent. that would provide \$1,000 yearly salary for 125,000 teachers, and a like salary for another army of 125,000 nurses."

Four hundred billion dollars was expended in a war which took 30,000,000 lives. Surely, a similar amount expended in a peace, would save a similar number from sufferings attendant upon economic depression.

Recover Sunken Gold

Five Million Dollars Removed From

Held Off Strongly

Bullion valued at \$1,000,000 (50,000,000), was removed by a private salvage firm from the sunken steamer *Laurentic*, which was sunk at the bottom with a German torpedo in 1917, the London Mail says.

Admiralty divers salvaged 45,000,000 between 1918 and 1924 and abandoned the remaining \$1,000,000 because the ship had been smashed and buried in the sand.

Salvage operations on the steamship *Laurentic*, a 15,000-ton White Star liner which lay in 120 feet of water, are known among the most difficult ever attempted.

British navy divers did in rubber mits made more than 5,000 dives to recover \$5,000,000 worth of bullion.

The *Laurentic* was sunk off the mouth of Lough Swilly in Northern Ireland, in a position exposed to westerly and northerly gales.

Belongs To England

The origin of the term "God save the King" has always been a matter for argument, but most authorities agree on one point, that it is English. It was "adopted" by the Franks, and with appropriate verses became the Prussian national anthem. So it is quite erroneous to say that it "belongs" to Germany. In the sense that it was borrowed from them.

Mail By Rocket

German Invention May Shoot Letters

From Rome To Calais

A rocket mail service was established last December, England, and Calais, France. The enterprising *Laurentic*, which was sunk at the bottom with a German torpedo in 1917, the London Mail says.

Admiralty divers salvaged 45,000,000 between 1918 and 1924 and abandoned the remaining \$1,000,000 because the ship had been smashed and buried in the sand.

Salvage operations on the steamship *Laurentic*, a 15,000-ton White Star liner which lay in 120 feet of water, are known among the most difficult ever attempted.

British navy divers did in rubber mits made more than 5,000 dives to recover \$5,000,000 worth of bullion.

The *Laurentic* was sunk off the mouth of Lough Swilly in Northern Ireland, in a position exposed to westerly and northerly gales.

Valuable Copper Salvaged

Five hundred tons of copper, valued at over \$80,000, were recovered from the sunken *Speculator* off Kingsdale, Irish Free State, by the Italian salvage ship *Arione* in the first 14 days of operation. The *Arione* is believed to be directly over the spot where the *Laurentic* was sunk by a torpedo during the World War. The *Laurentic* contains over \$5,000,000 in gold bullion.

Some Interesting Facts

Article Deals With African Desert

And Its Inhabitants

News of the World, London, says: "In an interesting article in the National Geographic Magazine it is stated that it is not only in the country that motor-buses are cured, but that Arab camels are used in protest and abuse of the motor, which fling choking clouds of dust all over the pilgrims."

"Away, thou son of a dog! I've Allah! What an invention of the devil! May your bones break and be turned to clods by the sun!"

"But in another four years the poor camels may have still more cause to protest, for the road along which the pilgrims travel will probably be the route of the proposed Jeddah-Mecca railway."

"The same authority says that most of the elephant herd that is widely accepted is fabulous. The elephant has a wonderful memory, but the least does not often recall a wrong. If elephants avenged every beating there would be a very high mortality among elephant trainers and attendants."

"If the trainer or keeper fears the animal, and does not at once subdue it with force, then that particular elephant will continue to intimidate him, and he may eventually be killed. If, however, he subdues it at once by force, it will then usually submit to his authority ever afterwards."

"It is often said that African elephants cannot be trained, and therefore are seldom seen in circuses or zoos. The African elephant is as easily trained as the Indian."

The great Jumbo was taught to carry children on his back in the London Zoo, and was a docile and safe elephant. The Belgians at Apri one of their stations in the Congo are using trained African elephants to plough fields and to pile and carry logs and lumber."

Alberta Teachers

Considerable Versatility Is Demanded

By School Boards

Some Alberta school boards apparently demand considerable versatility of talents in their school teachers. This was revealed at Edmonton at the hearing of appeals for alleged wrongful dismissal of teachers conducted before Judge Macdonald, sitting as a board of referees.

A young woman teaching in the Willingdon district claimed she had been dismissed because she could not sing at a board of referees.

Another board, through its chairman, stated that the teacher had been dismissed because she was high strung and was continually bawling the pupils on the heads.

Almost Everything

A youth had just driven home from college, at the close of the term. "Did you pass everything?" asked his mother anxiously.

"Everything but two motorcycles. They must have had airplane motors in them."

The "lost world" of southern Venezuela is being explored by a scientific expedition.

WHEN THE DAVIS CUP STAYED IN ENGLAND

The total length of the Amazon river from the head waters of the Ucayali is about 3,300 miles.

The Alaskan coast, on Disenchantment Bay, rose 47 feet during the 1896 earthquake.

The make up of the ship will require 35,000 tons of steel. The catering department will contain 200,000 pieces of crockery. Ten miles of carpets will be used in covering the ship's floors. Tableware, including knives, forks, spoons, etc., will cost \$2,000,000. The ship's laundry will be done by a machine-driven typographic device weighing 300 tons.

This device will keep the ship steady in the roughest sea. The captain's bridge will be 100 feet above the water line. The steam engine valves will be large enough to swallow a subway car. The main deck will contain shady garden lounges, palm courts and swimming pools, giving a tropical aspect to the ship during all the seasons. The steamer will be insured for approximately \$7,000,000.

In her 53 flights across the Atlantic, the Graf Zeppelin has never been more than an hour behind her schedule and in many cases she has been several hours ahead.

Tests have shown that actors or actresses in a hall will be much heavier in cold weather, because the heavier clothing of the audience absorbs more sound.

An aviator's hand gauge for measuring wind velocity, small enough to be slipped into a pocket is being used by Russian aviators.

Fight Auto Invasion

French-Canadians Do Not Want

Queen Of The Seas

The only city in the Dominion which boasts a mountain in its midst is in the middle of a small war about the mountain.

Mount Royal, the rearing landmark from which the metropolis of Canada derives its name, is the bone of contention in an argument as to whether automobiles shall be allowed for the first time in history to scale its summit.

The mountain broke into the headlines when A.H. J. Allan Bay ventured the suggestion motorists be permitted to wind their way upward to its wooded dells and broad expanses of grass overlooking the modern city. An immediate storm of protest broke and thousands of citizens voiced their determination to preserve the primitive natural charm of Montreal's namesake for future generations to enjoy.

One of the few fortresses yet remaining against the advance of the automobile age, Mount Royal has continued to share its picturesque quaintness with Bernadette's motorious avenues. To date, only pedestrians, bicyclists and the horse-drawn Victoria which are heritages of another age in Montreal, are allowed on the mountain and the French-Canadians who regard the great rock as part of the rich tradition of their land, demand the banning of the automobile horns will never be allowed to break its spell.

Have Suffered Most

Thousands Of German Prisoners

Sseek Work In Foreign Countries

Some 7,500 academic and professional refugees from Nazi Germany are now attempting to create a new existence for themselves in foreign countries. The New York Emergency Committee in Aid of Displaced German Scholars reveals. It is declared that "of all classes affected by the National-Socialist revolution in Germany, the academic and the professional have suffered the most."

A high commission for refugees coming from Germany is co-ordinating the work in various countries. Sixty German scholars have been placed in American universities for higher learning. More than 1,300 German scholars have been displaced, of whom 600 to 700 have or will shortly emigrate. Between 5,200 and 5,500 professional people have left Germany and 1,500 to 1,600 of the 7,600 German university students forced to quit their studies have sought refuge in England.

British farmers registered as farm cheese-makers with the milk marketing board of Great Britain last month numbered 1,284, owning 54,600 cows with an estimated output of milk of 22,000,000 gallons per annum.

The total length of the Amazon river from the head waters of the Ucayali is about 3,300 miles.

The Alaskan coast, on Disenchantment Bay, rose 47 feet during the 1896 earthquake.

The make up of the ship will require 35,000 tons of steel. The catering department will contain 200,000 pieces of crockery. Ten miles of carpets will be used in covering the ship's floors. Tableware, including knives, forks, spoons, etc., will cost \$2,000,000. The ship's laundry will be done by a machine-driven typographic device weighing 300 tons.

This device will keep the ship steady in the roughest sea. The captain's bridge will be 100 feet above the water line. The steam engine valves will be large enough to swallow a subway car. An aviator's hand gauge for measuring wind velocity, small enough to be slipped into a pocket is being used by Russian aviators.

Gigantic Cunard White Star Liner

Some Startling Facts About The New Queen Of The Seas

The name of the new Cunard White Star liner now known as No. 534 will be divulged 24 hours before the hull slips down the ways at Clydebank, Scotland. Queen Mary, styled by King George V, will launch the new steamer. The ship will be at least 1,018 feet long and register 73,000 or more gross tons.

She will cross the Atlantic from England and France in four days. The cost of the superliner has been estimated at \$30,000,000. The vessel will have 11 decks, one the first class promenade being 750 feet long, just 35 feet less than the entire length of the Mauritania. She will have five times the tonnage of the original Cunard ship, the Britannia. The height to the funnel will be 250 feet. The hull will weigh 163 tons. The Aquitania's is but half this weight.

The ship is built to a length of 1,018 feet, and will weigh 73,000 tons.

There will be 2,000 portholes and windows, the planes of glass ranging from 10 to 12 inches in diameter. The oval portholes will be more than four miles in length. The anchors, of special design, will weigh 10,000 lbs. largest. There will be 60,000 cwt. of automatic steering gear will be the largest on any ship. The ship will be driven by single-reduction gear turbines supplied with steam from high-pressure water-tube boilers.

There will be four screw propellers, each driven by a pair of turbines. The driving machinery will be placed in two separate engine rooms. Four turbo-generators will supply power to the auxiliary machinery. Three others will supply light and power to the hotel services in the ship. Oil fuel will be used. The propellers will each weigh 35 tons and measure 20 feet from tip to tip. There will be 257,000 lbs. of fuel, varying in length from two to 18 inches and geared to the turbines.

The ship will be 100 feet long. The hull will be 100 feet long. The hull will be 100 feet long. The hull will be 100 feet long.

Commemorate Early Flight

Aeroplane Kept In Air From Dawn

To Dug At Edmonton

The twenty-fifth anniversary of flying in Canada was effectively commemorated at Edmonton recently when a group of members of the Edmonton and Northern Alberta Aero Club kept an aeroplane aloft for 15 hours, 15 minutes in "a dawn-to-dusk" flight.

In common with other flying clubs across the Dominion, the flights were carried out, each machine staying in the air for shifts of one hour, to be replaced by another before the first had touched the ground.

Pilot C. North, hopping off at 5:00 a.m., was the first to commence the flight, while Pilot Ben Jensen was the last to land when he brought his machine down at 6:25 p.m. after a black rain cloud and thunder made the sky too black to continue.

Miss Margaret Pank was the only woman pilot to take part in the commemoration of the flight made by a Britisher, and she, too, was in his crusade, "Silver Hawk" 25 years ago, August 16, in Nova Scotia.

The flight was a success, and the aeroplane was kept in the air for 15 hours, 15 minutes in "a dawn-to-dusk" flight.

The flight was a success, and the aeroplane was kept in the air for 15 hours, 15 minutes in "a dawn-to-dusk" flight.

Painting Book

Here's a PAINTING BOOK
FREE for the asking!

And a chance to
WIN one of the
many fine prizes!

You are just going to love the Painting Book prepared for you by the makers of Keen's Mustard. It will tell you how to paint with your own paint or crayons!

Tell Mother you are going to the store to get KEEN'S GIFT BOOK!

Get your copy right away, for your dealer has only a limited number for free distribution, and we don't want YOU to miss out on this gift. You, too, will say "It's Keen as Mustard!"

And maybe you will win a fine prize in money, a bicycle, roller skates or a pig pen, set, baseball, box or dolls or doll's coming, etc. Wouldn't that be grand?

Remember, you don't have to buy anything to get the book, though when you tell Mother you will probably want you to bring a can of KEEN'S MUSTARD back with you. So get it now! It's free today. Send names and show folks what a swell artist you are.

If you cannot get the Book from your dealer, write to us, enclosing a stamped, self-addressed envelope, and we will mail you one. Write to: Mrs. J. H. Keen, 1000 Avenue St., Montreal, P.Q.

OCCASIONAL WIFE

By
EDNA BOOTH WEBSTER
Author of "Jorena," "Lipstick Girl," Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry, deciding to live their own lives apart until Peter is able to provide for them. Peter is a young, struggling sculptor, trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Ada, Peter's mother, wealthy, who is trying to win Peter's love; Peter's sister, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Ada and Sylvia are waiting for them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla tries to accept some of her earnings to help him along, but Peter, refusing and they quarrel. After a visit to the beach, Camilla, Ada and Gus Matson, who has been studying for his exhibit and asks Ada and Camilla for suggestions as to a name for it. Camilla suggests "Youth" and Ada "Inspiration". Peter adopts the latter. Camilla, heartless, goes to Peter's studio for a look at the picture and Ada and Gus follow later, and as the lights are turned on, see the statue has been shattered to pieces. Camilla accuses Camilla of doing this, and Camilla, stunned by the accusation, hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters at his exhibit a statue he has sculptured especially for her as a wedding gift. They named it "Land of Hope". Camilla's advertising campaign and Tiny Todd broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the artist and artist who was so ably stimulating business for his company. Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France. After the ship's departure from New York, he is on his way to his cabin when he meets Ada and Gus.

(Now Go On With The Story)

CHAPTER XVIII.

It was in such a mood, when Peter had been exceptionally gentle and solicitous during the evening, that Ada ventured upon a long-dropped subject while they smoked and talked in a secluded corner of the deck to gether. He had not mentioned Camilla's name in her presence the day, and she asked the remark

"Blue" Spells

Reduce some women to the penitent shadow of their smiling selves. Others take the Vegetable Compound when they feel the "blues" coming on. It steadies quivering nerves, helps to restore the general health, gives them more pep — a new charm.

are in love with some man who doesn't reciprocate?" She nodded silently her head resting against the back of the chair and her half-closed eyes watching him covertly.

"I'd say he was all kinds of a sap and to make up and find himself," Peter declared forcefully, then sighed deeply. "Cosh, this love business is a wild, untamed thing, anyway. Why do people select their life partners by impulse and emotion instead of by practical reasoning as we venture into any other kind of business?"

"Because there is no getting away from love, I guess," he pensive. "Well, what is it, then? How do we recognise it when we find it? Why isn't it complete for us?"

"Why, Peter, you talk as if you never had been in love!"

"Why?" "Because you would know the answers to all those questions."

Silence then. "Well, I don't." He could not escape from that strange sensation which Ada's revelation about Camilla had given him. The thought that she, his precious Camilla, would so betray and humiliate him at the very climax of his ambitious efforts tortured him like the closing of a door behind him. He felt as if of a garrote around his neck. He might have doubted her guilt, but Ada told him so simply and so definitely, and he felt as if he had been deceived and hurt and angry by her.

He brooded in silence for while into which Ada did not intrude. Finally, he arose impatiently as if the inertia of sitting quietly was no longer to be endured. "Should you like to go in?" he asked tensely. "I'm not much of a companion this evening. This thing has got me so—stand that I hope you understand that I'm not—"

"Of course," she interrupted kindly. "I'm only so sorry that I mentioned it, Peter."

"I'm glad—mightily glad to know it," he contradicted. "More than anything else, I hate deceit. It helps a lot to get it off my mind."

"Well, don't you do anything rash—like jumping aboard."

"Not on your life! I think I have discovered on more than one tonight that love isn't worth all the suffering we take with it."

"Oh, Peter, dear don't be cynical," Ada pleaded.

"I'm not. Only being sensible."

She laughed softly. "You are much too romantic to move this thing tonight for a beginning, she exulted. If he could take him along that far toward her goal within four days, what was the chance of his reaching it by that time, she could make him wonder what he ever saw that was attractive about Camilla. She would make herself indispensable to his life.

Camilla resolutely followed the outline of her own path, the benevolence of blessed, fatiguing, mind-occupying work. If two days could be so interminable and wretched as this, how was she going to endure the year ahead of her? She tried to convince herself that as time passed, she would become accustomed to Peter's absence and would be happier. But he did not want time and absence to dull her need of Peter. If so, what then? She would have nothing left. Nothing for which to live and hope and work. Life then would be just a monotonous existence, without aim or reason or pleasure.

And what of Peter, immersed in his work, involved in his life, his life was dull? Protest heat with broken wings within her breast.

Resolutely, she put her thoughts aside and summoned her will to concentrate upon the actual lines of her characters. She was working at the office, but she would not let her thoughts prevent her thoughts of Peter entering.

Her secretary announced a gentleman to see her. "He says he is urgent, but would not give his name," Miss Scott explained.

Camilla frowned with annoyance. "Probably another noisy clerk who got in with his high-air baggage. This radio publicity makes me a good deal more popular than I'd like to be for a minute."

(To Be Continued)

As long ago as 1868, Westminster, England, tried out a red and green traffic signal in the form of a gas lamp and used only at night.

Eloquent Plea Of Indian

Magistrate Dismisses Case Of Breach Of Game Laws

"Canada is our country," God gave us months to eat and put game in the country for us to live on. It is the only way we have of getting a living. You white men have an education and a job to live by, but we have no other way," John O'Case, Chippewa Indian chief, explained to Magistrate H. E. Thibault at Edson, Alta., when charged with illegal possession of big game carcasses. The magistrate dismissed the case.

Evidence disclosed that in July a party of 40 Chippewa Indians moved from the Rocky Mountain House district to Marlboro and began to kill moose and deer. Alarmed lest game should be exterminated through a general slaughter, citizens complained.

The magistrate, in announcing his decision, said that unless he had instructions from the attorney-general's department he could not see his way clear to convict the full-blooded, non-treaty Indians who do not live on reserves, as long as they were not making a wholesale slaughter.

He took the stand that the Indians knew of no other way of making a living and unless the government was prepared to look after them, he was not prepared to register a conviction.

A sister of the accused chief, who asked if she could address the court after evidence was taken, and having received permission to do so, described eloquently the experiences of her tribe and how loyal they had been to the white people in times of trouble. She claimed on one occasion when the Prince of Wales was visiting in their district that they had helped him. Her address lasted 45 minutes, during which she made a stirring plea for her brother's acquittal, but that they had a mother 100 miles out to take care of.

On dismissing the case, the magistrate warned the chief that he must endeavor to obey the laws of the land as far as possible. Chief O'Case agreed readily and shook hands with the magistrate.

Proud Of Its Record

Tree In Nova Scotia 170 Years Old Still Bearing Apples

George R. Whiteman believes he has on his farm at Lawrenceville, Nova Scotia, the oldest apple-bearing tree in the Annapolis valley. It is 170 years old and in its lifetime has produced 600 barrels of excellent fruit.

The seed for the leafy giant came up with the Whiteman family from their English home in 1702. It was planted by Mr. Whiteman's great-grandmother. Long years ago the seedling tree was grafted with the Nonpareil variety.

Some seasons it produced 12 barrels of marketable apples and while it has been the pride of the family, it has been the pride of the community. Some seasons it produced 12 barrels of marketable apples and while it has been the pride of the family, it has been the pride of the community.

Paris Has Good Zoo

Paris boasts that its new zoo, which was opened by the President of France, is one of the largest and most complete in the world. It covers 45 acres in the heart of the Bois de Vincennes, on part of the site of the Exposition of 1931. It is larger than the London, Amsterdam or Antwerp zoos and contains 2,000 animals, including specimens from every part of the globe.

Nice (in the picture gallery): "Aunt Sarah, this is the famous 'Angels,' by Millet."

"And that," said the artist, "is the famous 'Angels,' by Millet."

People who own calendars should put a "No tipping" sign on them.

Process Of Henry Fox Talbot Dates From 1835

Among inventors who have revolutionized life, Henry Fox Talbot of Lacock, England, is less well known than he should be, although, by means of patents, he took peculiar pains to establish the priority of his inventions over those of Daguerre. His century has had particular interest. His earliest result dates from 1835, but he did not learn to develop until 1840. Progress continued to be slow and it is uncommon to come across photographs of more than a few years ago.

Roger Fenton took a camera out to the Crimea in 1855.

The apocryphal is supposed to be a native of China and was brought in to Europe at the time of Alexander the Great.

IT'S EASY TO BAKE WHOLESALE BREADS WITH

ROYAL YEAST CAKES

Each cake wrapped in air-tight wadded paper—Royal Yeast Cakes always reach you in perfect condition. They keep fresh for months—can be stored in successful results because their full leavening power will not deteriorate. That's why Royal Yeast Cakes have been the standard of quality for over 50 years—why, today, they are preferred in 7 out of every 8 Canadian homes where dry yeast is used in home baking.

BUT MADE IN CANADA GOOD

Ancient Doll Goes Modern

Is 134 Years Old

Prized Possession Of Ontario Child Is 134 Years Old

Brought to Canada in a wooden chest whose date of manufacture was indicated as 1800, the doll is believed to have been made the same year. The body is wood, with joints fastened with screw nails for hinges.

The head, made of a substance resembling plaster of paris, is sewed and fastened to the body with screws. Meticulous to the triumph of Napoleon's hosts to the rise and fall of monarchies and empires, the doll by no means preserves the fashions of the dying years of the 18th century.

Until the present owner obtained the doll from her mother, who in turn received it from her mother. "Frau von Fretchen" were a creature gone home with a bustle and an old-fashioned bonnet to match. Now, however, she flaunts the acme of twentieth century modishness.

What is my next duty? What is the thing that lies nearest to me? That belongs to your every-day history. No one can answer that question but you. Your next duty is to determine just what your next duty is. There may be something you regret, or something you know you ought to do. You would know your duty if you thought in earnest about it and were not ambitious of great things. If it is something common-place that will make life dreary it will soon lead you to something more. Your duty will commence to comfort you at once, and will at length open the unknown fountain of life in your heart.—G. Macdonald.

THE RHYMING OPTIMIST

By Aline Michaels

TWO BIRDS

Two birds, flying wing to wing high above the plain, sail through summer's blossoming into night's domain.

Vast, purring shadows rise from earth's darkening face; swiftly, through the fading skies into dusk's embrace.

Two birds, careless of the voice of night, fly wing to wing; flying wing to wing rejoice in their silent flight.

Though they lose the sun's last spark and no comets shine, "Well, I never!" they face the dark, Two birds, wing to wing.

The Cause of the Drop in Wheat Prices

In explanation of the sudden drop in wheat prices during the week of August 12th, the assistant commercial editor of The Winnipeg Free Press, says: "No fundamental change occurred in the wheat situation—crop losses increased if anything yet values crashed almost a dime a bushel. A restoration from the steady advances was probably in order and a break of 3c or 4c was doubtless due but there appeared to be little or no justification for the flop that took place. It was simply another instance of small frightened speculators making a run on the market in an effort to escape being trimmed as they had been many times before. Most of the speculative grades have been stoppered and the great bulk of them called for liquidation at the moment. Buyers were of this and at the first sign of weakness they sat back to await the inevitable break in prices. It is of interest to note that while the market was advancing exporters bought liberally of Canadian wheats at the highest prices paid in years but immediately the price cracked a halt was called to the buying.

Russia May be Out of Wheat Market

Russian wheat authorities are pretty well unanimously of the opinion that Russia's wheat crop will be considerably smaller than last year. In that case Russia will be a very small factor in the international wheat trade, as last year she only exported about 30,000,000 bushels of wheat. The Russian crop this year suffered severely from drought at a critical time particularly the wheat areas of the south. Late rains were reported but Mr. Broomhall thinks they did very little good. The Russian government is making smaller grain collections this year than in past years which will bring down the amount available for export. A continental authority suggested the possibility of famine in the drought areas of Russia during the coming winter.

Local & General

Another old-timer to return to the district is Henry Lilly. Mr. Lilly left 12 years ago to take up residence in the States, but returns quite frequently to look after his farming interests.

Miss Edna Orr and Miss Betty Stevenson returned Wednesday from a holiday trip to Calgary and points north. Miss Orr is getting prepared to take up teaching duties in the Marshall school.

Dr. Brown arrived in town for a visit. Dr. Brown will be remembered by many as having practiced here some years ago. He still owns the old drug store building. Dr. Brown reported the crops in the Champion district the best he has seen. He now resides in Kitchener, Ont.
